

BCEP Fluorescent Bulb Recycling Program

*Bring in your old fluorescent bulbs,
and hand them to a staff member!*

Compact Fluorescents

Linear, U-Tube,
And Round

As of January 1, 2008 law requires businesses and homeowners to recycle fluorescent bulbs, due to their mercury content. BCEP is conducting a pilot fluorescent bulb recycling program to determine the public's needs and program costs. During the pilot, fluorescent bulbs will be accepted for recycling at no charge to either businesses or residents. After conclusion of the pilot, the District Committee will determine whether to continue the program and whether or not to charge for disposal.
